1. For "Modules" and "Custom" application types, which statement is true about the Currency dimension?

- ☐ The Currency dimension contains a list of currencies and exchange rate types.
- ☒ The Currency dimension contains a section for input currencies and a section for reporting currencies.
- ☐ The Currency dimension contains a single member called "Local" and other members representing reporting currencies.
- ☐ The Currency dimension is not provided with any content, and is set-up as a custom dimension.

2. A Department Manager requires access to all accounts in their own department, but only a certain account in all other departments. With the usual metadata security, the Manager would have access to all accounts across all departments. By enabling this type of security, the Service Administrator can control the intersection of all accounts with the Manager's department and only the specific account in all other departments.

What security feature can Service Administrators set to enforce this?

- ☐ Evaluation Order
- ☐ Account-level Security
- ☐ Grid-level Security
- ☒ Cell-level Security

3. A company would like to configure Financials, Workforce, and Projects. They would like to plan and forecast the Project dimension in Financials, as well as track employee utilization in Projects.

☐ Mark

Which two actions must they take to ensure that the Project dimension is shared and the data integrated correctly across all three modules?

(Choose all correct answers)

- ☐ In Workforce, rename one of the custom dimensions to "Project" and enable it.
- ☒ In Workforce, ensure that the granularity is at Employee or Employee and Job.
- ☒ In Financials, rename one of the custom dimensions to "Project" and enable it.
- ☐ In Projects, ensure that the Employee driver-based expense is enabled.

30. Which three statements are true regarding importing metadata from a flat file into Planning?

(Choose all correct answers)

☐ Mark for review

- ☒ You can rename or delete members of attribute dimensions during a metadata import.
- ☒ Your import file must contain a list of Metadata records; and each metadata record contains a delimited list of property values that matches the order designated in the header record.
- ☒ You can use import file functionality to import more metadata or to perform incremental updates from the source system.
- ☒ When selecting to clear members during the import, any member not specified is deleted from the outline after importing the dimension unless it is an ancestor of a member that was specified, or it is a base member of a shared member that was specified.
- ☐ You can import data forms, dashboards, and infolets by loading a local import file or an import file from the Inbox server.

37. Which statement describes Strategic Modeling?

☐ Mark

- ☐ It is used to model the flow of data by defining strategic rules for sharing data between modules.
- ☐ It is used to develop driver based strategic plans and generate core financial statements.
- ☒ It is used to quickly model and evaluate financial scenarios, and offers out of the box treasury capabilities.
- ☐ It is used to strategically manage and analyze finances at any business level with built in dashboards.

40. What are the two primary use cases for an ASO reporting cube?

(Choose all correct answers)

☐ Mark for review

- ☐ You want to save data for upper level members.
- ☐ You want to create and execute complex Calculation Manager business rules.
- ☒ You want to report on new Planning data originating from any source, such as a data warehouse.
- ☒ You want to report on Smart Lists.

41. Which four statements are true for the Optimize Dimension Feature?

(Choose all correct answers)

- ☐ Optimizing dimension order is available only for Financials and Workforce, and only for the provided BSO cubes that are created when you enable and configure.
- ☒ The new optimized dimension order is maintained even if you enable additional features or other modules.
- ☒ Optimizing dimension order is available only for BSO cubes in Custom Planning applications.
- ☒ Optimize dimension order in your test environment before performing it in the production environment.
- ☐ Optimizing dimension order is available only for Financials and Projects, and only for the provided BSO cubes that are created when you enable and configure.
- ☒ Before you optimize dimension order, refresh the database and then back up the application and download the snapshot.

☐ Mark for review

42. Which three statements describe the benefits of using Groovy Rules?

(Choose all correct answers)

☐ Mark

- ☐ You can use Groovy rules to define member formulas that combine operators, calculation functions, and numeric constants to perform calculations on members in Dimension Editor.
- ☒ You can use Groovy rules to perform complex procedural calculations in memory before submitting the results to the database.
- ☐ You can use Groovy rules to dynamically calculate data and add validation checks before saving data on custom composite forms.
- ☒ You can use Groovy rules to add validation checks for run time prompt values before running calculations, add data validation checks before submitting data, and add error handling.
- ☒ You can use Groovy rules to dynamically generate calculation scripts at runtime based on contexts defined in the Groovy script.

44. Which three are requirements when enabling Flexible Account Mapping in Workforce?

(Choose all correct answers)

☐ Mark for review

- ☒ For Mapping Level, specify whether the mapping should be done at the Global level (the same mapping for every entity) or at the Entity level.
- ☐ You must map Salary and Merit from Workforce to the same account in Financials and Projects.
- ☐ Financials and the Financials Expense planning option must be enabled in order to enable this feature.
- ☒ You can enable Flexible Account Mapping only when you bring your own chart of accounts in Financials.
- ☒ Specify whether the Mapping Drivers should be based on the Grade or on the Defaults for the application.

45. You want to share detailed benefits data from Workforce with Financials.

☐ Mark

Which statement describes the steps you must take?

- ☒ Enable and configure Financials and Workforce. Then in the Workforce Benefits and Taxes, select a financial account to map the benefit to. For Compensation Data, synchronize and run the data map.
- ☐ Enable and configure Financials, and Workforce. Then to capture Workforce expenses for employees, enable Standard Rates from Workforce. For the Compensation Data for Reporting data map, synchronize then push the data.
- ☐ Enable and configure Financials, and Workforce. When enabling Financials, create a custom Benefits dimension to map the data to. On the Financials Integration Summary form, run Calculate Compensation to update the Workforce data.
- ☐ Enable and configure Financials, and Workforce. When enabling Workforce, create a custom Benefits dimension to map the data to. Then for the Financial Statement Integration data map, synchronize and push the data.

49. Before EPM Administrators can import a Machine Learning model into Planning, which task must be completed first?

- ☒ EPM Administrators create a data model and push data to it to generate a PMML file.
- ☐ EPM Administrators create data maps and Groovy rules to move and process the data.
- ☐ Data scientists create Groovy rules designed to evaluate historical data and identify patterns.
- ☐ Data scientists build and train the ML model in a data science tool and save it as a PMML file.

50. Which three statements describe Intelligent Performance Management (IPM) offerings?

(Choose all correct answers)

- ☒ Quickly start your planning process and improve the accuracy of your forecasts with powerful and automated predictive capabilities.
- ☒ Harness the power of data science by performing what-if analysis on a trained ML model that has been imported into a Planning application.
- ☐ Assess the impact organizational projects and initiatives have on overall corporate resources, and ensure they align with short and long term financial targets.
- ☐ View and interact with high-level, essential information generated from different sources to help you quickly assess where to direct your attention.
- ☒ Reduce time spent in data analysis with financial pattern recognition on which you can evaluate and take action.

57. In Strategic Modeling, which three benefits of Simulations help improve forecast accuracy?

(Choose all correct answers)

- ☐ Simulations allow you to calculate the model a maximum of three times using random scenarios created from the input assumptions.
- ☐ Simulations limit you to performing a simple and error-prone what-if analysis by entering best guess estimates one cell at a time for uncertain input accounts.
- ☒ Simulations allow you to assign a range of possible values to uncertain inputs and analyze how that uncertainty affects related accounts.
- ☒ Simulations allow you to assess the likelihood of meeting target goals.
- ☒ Simulations allow you to see how key uncertain inputs affect your bottom line.

59. Which two are benefits of enabling Use Database Suppression in Smart Push?

(Choose all correct answers)

- ☒ It helps eliminate the impact on query thresholds and improving wait times.
- ☐ It automatically merges comments, attachments, and supporting detail when mapping a database for reporting.
- ☐ It allows you to load large amounts of data from an aggregate storage cube without using the missing block and row suppression options.
- ☒ It enables you to apply row suppression at the database level instead of the application level.
- ☐ It suppresses rows, or columns, or both that contain No Data/Missing or Zero, but not both.
