An app builder is given a spreadsheet everyone is sharing that needs to be added to Salesforce. The object with fields needs to be created and the data inserted simultaneously.

Which tool should be used?

- A. ☐ Import Wizard
- B. ☒ Lightning Object Creator
- C. ☐ Schema Builder
- D. ☐ Data Loader

☐ Mark this item for later review.

Salesforce Certified Platform App Builder

Time Remaining : 00:49:27

- 4 of 65.** An app builder creates an Account validation rule on the Industry field that will display an error if the length of the field is longer than six characters. Another app builder creates a workflow rule with a field update that sets the Industry field to Technology whenever the Billing City field is set to San Francisco.

What will happen the next time a sales rep saves an Account with a Billing City of San Francisco?

- A. ☐ The record will save but the Industry field will not change to Technology.
- B. ☒ The record will save and the Industry field will change to Technology.
- C. ☐ The record will not save and the validation rule's error message will be displayed.
- D. ☐ The record will not save and no error message will be displayed.

54 of 65. The marketing team at Universal Containers has a list of 400 leads it wants to upload to Salesforce. The team needs to avoid creating duplicate records.

Which two actions should be taken to meet this requirement?

Choose 2 answers

- A. ☐ Use Data Loader's update function to import leads and match to existing records based on e-mail address.
- B. ☐ Enable Duplicate Matching in the Data Management section in Setup and activate the Lead-to-Lead scenario.
- C. ☒ Utilize a Lead Matching Rule and corresponding Duplicate Rule to block newly created duplicate leads.
- D. ☒ Upload the lead list using the Import Wizard and select a Matching Type to prevent duplicate lead creation.

- 55 of 65.** Cloud Kicks is redefining its entire business process to convert the Manager Notes field from a long text area field. The goal is to encourage managers to be more concise in their comments and stay at 255 characters or less. There is preexisting information in the Manager Notes field that often is well beyond the character limit.

What would happen to any existing information if the app builder tries to convert a preexisting long text area field to text area?

- A. ☐ Preexisting information will remain even if it was over 255 characters.
- B. ☒ Preexisting information will truncate to the first 255 characters.
- C. ☐ Preexisting information will cause an error message to pop up.
- D. ☐ Preexisting information in the field will be completely lost.

56 of 65. Cloud Kicks has three types of customer support processes: Platinum, Diamond, and Bronze. The app builder created separate record types for each process on the Case object. The customer support team should be unable to create new cases with the Bronze record type.

How should this requirement be met?

- A. ☐ Update the support team profile to remove the Bronze record type.
- B. ☐ Update the organization-wide defaults to private for Case.
- C. ☒ Create a permission set group for Case that includes Platinum and Diamond record types.
- D. ☐ Make the record type hidden to support users; update sharing rules to private.

57 of 65. Cloud Kicks has a sales rep who is stating that their Contact is unavailable for other users to see within Salesforce.

In which three ways can an app builder troubleshoot this issue?

Choose 3 answers

- A. ☒ Verify the users with the issue have access to the Contact object.
- B. ☐ Create an Account Sharing Rule to give the users access to all records.
- C. ☐ Create a new Contact and have the users try again.
- D. ☒ Review the Contact record and ensure it is linked to an Account.
- E. ☒ Confirm whether Default Organization-Wide Sharing Settings provide access to the Account.
